

Quick Links

- **Live Preview:** <https://rum-valley-parts.vercel.app>
- **Support:** parts@rumvalley.com | (734) 744-4091

Step 1: Deploy to Vercel (Live Website)

One-Click Deploy

1. Go to <https://vercel.com/new>
2. Click "Continue with GitHub"
3. Select your repository
4. Click "Deploy"
5. Site will be live at: <https://rum-valley-parts.vercel.app>

Step 2: Create GitHub Repository

1. Go to <https://github.com/new>
2. Repository name: `rum-valley-parts`
3. Make it **Public** or **Private**

4. Click "Create repository"

Push Your Code

```
~ bash
cd rum-valley-parts
git remote add origin https://github.com/YOUR_USERNAME/rum-valley-parts.git
git push -u origin master
```

```
~
```

Step 3: Set Up Supabase (Database & Auth)

Create Project

1. Go to <https://supabase.com/dashboard>
2. Click "New Project"
3. Fill in:
 - Name: `rum-valley-parts`
 - Database Password: (create strong password - save it!)
 - Region: US East (recommended)
4. Click "Create new project" (wait 2-3 minutes)

Run Database Schema

1. Click "SQL Editor" in left sidebar
2. Copy contents of `database-schema.sql` from your project
3. Paste and click "Run"
4. This creates tables: profiles, products, orders, order_items

Get Your Credentials

1. Go to Settings (gear icon) → API
2. Copy:
 - **Project URL:** `https://xxxxx.supabase.co`
 - **anon/public key:** `eyJhbGciOiJIUzI1NiIs...`
3. Add to `.env` file and Vercel environment variables

Enable Email Auth

1. Go to Authentication → Providers
2. Enable "Email"
3. (Optional) Disable email confirmation for testing

Step 4: Set Up Stripe (Payments)

Create Account

1. Go to <https://dashboard.stripe.com/register>
2. Sign up with business email
3. Complete identity verification
4. Add bank account for payouts

Get API Keys

1. Go to Developers → API keys
2. Copy **Publishable key** (starts with `pk_test_`)
3. Add to `.env` as `VITE_STRIPE_PUBLISHABLE_KEY`
4. Also add to Vercel environment variables

Test Cards

- Success: 4242 4242 4242 4242
- Decline: 4000 0000 0000 0002
- Any future expiry, any 3-digit CVC

Step 5: Configure Environment Variables

Local (.env file)

```
bash
VITE_SUPABASE_URL=https://your-project.supabase.co
VITE_SUPABASE_ANON_KEY=your-anon-key-here
VITE_STRIPE_PUBLISHABLE_KEY=pk_test_your-stripe-key-here
```

Vercel Dashboard

Go to: Your Project → Settings → Environment Variables
Add the same three variables.

Step 6: Testing

Full Flow Test

1. Browse catalog → Add items to cart
2. Go to cart → Proceed to checkout
3. Fill shipping info (test data ok)
4. Use test card: `4242 4242 4242 4242`
5. Complete order → See confirmation

User Accounts

1. Go to /signup
2. Create test account
3. Login and verify member pricing
4. Check /dashboard for profile

Step 7: Go Live

Switch to Production

1. Update Stripe key to **live** key (`pk_live_...`)
2. Update Vercel environment variable
3. Redeploy: `npx vercel --prod`

Custom Domain (Optional)

1. Vercel Dashboard → Settings → Domains
2. Add your domain (e.g., `parts.rumvalley.com`)
3. Update DNS records
4. SSL auto-provisioned

Troubleshooting

Issue	Solution
-----	-----
Site not loading	Check Vercel deployments tab for errors
Cart not working	Clear browser cache, check console
Payments failing	Verify Stripe keys, check webhook endpoint
Database errors	Verify SQL schema was run, check RLS policies

Features Included

Working Now

- Product catalog (650+ parts)
- Shopping cart (persists between sessions)
- Checkout flow with shipping calculation
- Member vs. public pricing
- Product search and filtering
- Mobile-responsive design
- Order confirmation page

Needs Configuration

- User authentication (requires Supabase setup)
- Real payments (requires Stripe connection)
- Order history (requires database)
- Email notifications (requires email service)

Next Steps

1. Import full catalog from MVP Truck Parts (2,000+ products)
2. Set up email notifications for orders
3. Add admin dashboard for order management
4. Implement inventory sync with suppliers
5. Add EDI integration for fleet customers

Built with: React, TypeScript, Tailwind CSS, shadcn/ui, Supabase, Stripe
