

Rum Valley Parts - Project Summary for Client

What We Built Today

We created a complete **online truck parts store** for Rum Valley. Think of it like a website version of your physical store at 11902 Farmington Rd.

Here's What's Ready Right Now:

- ✓ **Product Catalog** — Over 650 truck parts organized by category (Engine, Brakes, Suspension, Transmission, etc.)
- ✓ **Search & Filters** — Customers can search by part name, SKU, brand, or filter by truck make/model/year
- ✓ **Shopping Cart** — Customers add parts to cart, adjust quantities, and remove items
- ✓ **Checkout Process** — Full checkout flow where customers enter shipping info and "pay" (currently in demo mode)
- ✓ **Member Pricing** — Two pricing tiers: regular price vs. wholesale/member price (requires account login)
- ✓ **Mobile Friendly** — Works on phones, tablets, and computers
- ✓ **Order Confirmation** — After checkout, customers see a confirmation page

The Site is Currently Live At:

- Local: <http://localhost:8080/>
- Public: (will be ready after deployment)

What Your Client (Rum Valley) Needs to Do Next

STEP 1: Set Up User Accounts (FREE - Takes 10 Minutes)

Right now, the site can *pretend* to have accounts, but it doesn't actually save customer information anywhere. To make it real:

1. Go to <https://supabase.com> and create a free account
2. Create a new project called "rum-valley-parts"
3. Copy the SQL code from a file called `database-schema.sql` (we gave you this)
4. Run it in their SQL Editor
5. Copy two codes they give you (called "URL" and "anon key")
6. Send those codes to us — we'll add them to the website

Cost: FREE for starter plan (enough for hundreds of customers)

STEP 2: Set Up Payments (Takes 15 Minutes)

Right now, the checkout page *looks* real but doesn't actually take money. To accept real payments:

1. Go to <https://stripe.com> and sign up (it's free to start)
2. Verify your business information

3. Get your "Publishable Key" from the dashboard
4. Send that key to us

Cost: Stripe takes 2.9% + 30¢ per transaction (standard for all online stores)

STEP 3: Put It On The Internet (We Can Do This)

Once you give us the codes from Step 1 and Step 2, we can:

- Connect the website to your custom domain (like `parts.rumvalley.com`)
- Turn on real payments
- Save customer orders to a database
- Send email confirmations when someone orders

Simple Checklist for Rum Valley

Task	Who Does It	Cost	Time
------	-------------	------	------

-----	-----	-----	-----
-------	-------	-------	-------

Create Supabase account	You	FREE	10 min
-------------------------	-----	------	--------

Create Stripe account	You	FREE	15 min
-----------------------	-----	------	--------

Send us the API keys	You	—	2 min
----------------------	-----	---	-------

We connect everything	Us	—	1 hour
-----------------------	----	---	--------

Test the full flow	You	—	15 min
--------------------	-----	---	--------

Go live!	Us	—	30 min
----------	----	---	--------

What Happens After We Launch

Once everything is connected:

1. **Customers** can browse 650+ parts, add to cart, and check out
2. **You** receive order notifications with customer details
3. **Wholesale customers** can create accounts and see discounted pricing
4. **You** can track inventory and manage orders from a simple dashboard
5. **The site** works 24/7 — customers can order anytime
